

## Travis Tincher

Software Developer Houston, Tx | 903.574.1520 | [trtincher12@gmail.com](mailto:trtincher12@gmail.com)  
</in/travis-tincher/> | [github.com/trtincher](https://github.com/trtincher) | <http://travis-tincher-portfolio.surge.sh/>

I'm a software engineer who builds user forward websites with an eye towards integrating function and design! I have a diverse background in philosophy, theology, art and beer, which has given me an eye for aesthetic and a mind for productivity.

## Skills

### *Technical*

HTML5 | CSS | JavaScript | React | Express | MongoDB | Mongoose | Git | Github | RESTful API | Bootstrap | Bulma | SCSS | jQuery | Axios | MERN | Agile | Ruby on Rails | PostgreSQL | Heroku | Postman | Adobe Photoshop | Adobe Illustrator

## Projects

**Brewery mApp:** <https://github.com/trtincher/Project2-BreweryApp>

- A map app to graph and collect your brewery experiences.
- Used React/Bootstrap/HTML5 to create views.
- Employed Axios to call in external data from <https://www.openbrewerydb.org/>.
- Utilized Git for version control and branch testing before implementation on the master branch.

**Forté:** <https://github.com/trtincher/P3-GroupLab-Frontend/tree/dev>

- Created wireframes using Miro group boards.
- Built backend with Express/Mongoose/MongoDB to create related teacher and student models with full CRUD functionality.
- Used HTML5/SCSS/React/Axios to create the views.
- Utilized Git for version control and remote team organization. Team members used branches and pull requests to the main branch to maintain an orderly project workflow.

**Familiar:** <https://github.com/trtincher/Project4-Frontend>

- Character management app for Dungeons and Dragons 5th ed.
- Created wireframes using Miro boards.
- Implemented React/Style Components/HTML5 to create views.
- Built backend with Javascript/Node.js/Express/Mongoose/MongoDB to create user and character models with full CRUD functionality.
- Employed Axios to call in external data from <https://www.dnd5eapi.co/>.
- Utilized Git for version control and branch testing before implementation on the master branch.

## Portfolio

- Used HTML5 and CSS to create the portfolio layout and visuals.
- Employed Javascript and jQuery to create a dynamic portfolio card display and links.
- Utilized Git for version control and branch testing before implementation on the master branch.

## Additional Experience

**Starbucks Coffee Co.** / Barista

JANUARY 2020 - May 2020, Houston, TX

Provide customer service through the creation of hand crafted beverages.

**Saint Arnold Brewing Co.** / Brewer, Bartender

MARCH 2018 – December 2019, Houston, TX

Participate in the production of beer. This includes brewing, fermentation, and filtration of beer, as well as responsibility for all cellar cleaning and sanitizing duties, and serving on the sensory panel for continual quality control.

## Education

**General Assembly** / Software Engineering and Development

MAY 2020 - AUGUST 2020

**Emory University** / Master of Theological Studies

AUGUST 2013 - MAY 2015, Atlanta, GA

**Texas A&M University** / Bachelor of Arts in Philosophy

AUGUST 2010 - AUGUST 2012, College Station, TX
